

Stephen C. Krieger, MD, FAAN

Stephen C. Krieger, MD, FAAN, is a multiple sclerosis (MS) specialist at Mount Sinai Medical Center, where he is Associate Professor of Neurology and Director of the Neurology Residency Program. He joined the Corinne Goldsmith Dickinson Center for MS as a fellow in multiple sclerosis after

completing his neurology residency training at Mount Sinai. He graduated from Columbia College, and received his MD degree from Yale.

Dr. Krieger has received several teaching and mentorship awards including the George Forster Compassion Award in 2014. He has written review articles on and lectures nationally about MS, and in 2015, he proposed the “Topographical Model of MS”, a new conceptualization of MS disease course that was published in the journal, *Neuroimmunology & Neuroinflammation*, and was the subject of an article in *Scientific American*.
